## Installation of Master Flash®

### EPDM and Silicone

- Master Flash can be installed on-site quickly and easily, usually under 10 minutes.
- One-piece construction makes Master Flash easy to handle.
- Bendable base forms seal with any contour, surface irregularities or roof pitch.
- Seals tightly and dependably with silicone sealant to eliminate costly call-backs.
- Pipe opening is easily customized with a sharp knife or scissors for any application.

Master Flash is a registered trademark of Aztec Washer.

### Silicone Master Flash demonstrated.

#### SELECT and TRIM...

Choose appropriate Master Flash with opening at least 20% smaller than pipe diameter. If necessary trim opening to 20% smaller than pipe diameter.

#### SLIDE...

Slide Master Flash down over pipe. (A non-petroleum base lubricant will ease installation.)

#### FORM...

Press Master Flash down, bending it to conform to roof profile or roof irregularities. A blunt tool will help press flashing into tight roof angles.

#### SEAL...

Apply sealant between base and roof.

#### FASTEN...

Use fasteners to complete sealing. For UPC installation, fastener spacing may not exceed 1-1/2" (38mm).
