Installation of Master Flash®

EPDM and Silicone

- Master Flash can be installed on-site quickly and easily, usually under 10 minutes.
- One-piece construction makes Master Flash easy to handle.
- Bendable base forms seal with any contour, surface irregularities or roof pitch.
- Seals tightly and dependably with silicone sealant to eliminate costly call-backs.
- Pipe opening is easily customized with a sharp knife or scissors for any application.

Master Flash is a registered trademark of Aztec Washer.

Silicone Master Flash demonstrated.

SELECT and TRIM...

Choose appropriate Master Flash with opening at least 20% smaller than pipe diameter. If necessary trim opening to 20% smaller than pipe diameter.

SLIDE...

Slide Master Flash down over pipe. (A non-petroleum base lubricant will ease installation.)

FORM...

Press Master Flash down, bending it to conform to roof profile or roof irregularities. A blunt tool will help press flashing into tight roof angles.

SEAL...

Apply sealant between base and roof.

FASTEN...

Use fasteners to complete sealing. For UPC installation, fastener spacing may not exceed 1-1/2" (38mm).
